REASONS FOR ALLOWANCE

1. Claims 1-8 are allowed over the prior art of record.
2. The following is an examiner's statement of reasons for allowance: the Applicant's arguments filed on 4/6/2007 are persuasive. The feature of independent claims 1 and 4 directed towards allowable subject matter is the feature comprising applying a booting current to each of the data electrode lines at the beginning of the next horizontal drive time and a booting current having instantaneous values which are kept constant and an application time amount that for the booting current is proportional to a magnitude change of each display data signal in the next horizontal drive time period with respect to the display data signal in the current horizontal drive time period. As argued by the Applicant, Iketsu teaches of a blanking period to selectively discharge residual electric charges in individual data electrodes instead of discharging residual electric charges in all data electrodes, and fails to teach of said feature. None of the prior art of record suggests or teaches of the claimed limitations. Therefore said features of claims 1 and 4 in combination with the other limitations of the claims, makes claims 1-8 allowable over the prior art of record
3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
